PAHO'S Better Care for NCDs Initiative: Accelerating Actions in Primary Health Care

Strategic Areas of Work and Results Achieved

Strategic

Areas

+ HEALTH

6. Improvement of NCD information and monitoring

Initiative Dashboard online with regional epidemiological data, global NCD targets, and NCDs scorecard report.

5. Expansion of essential NCD **medicines and technologies**

90% to 50% savings on diabetes meds, HPV tests, vital signs monitors. Deployment of 158 thermal ablation devices for cervical cancer across 9 countries

4. Primary health care workforce development for NCDs

1. Country plans for **scale up and expansion** of comprehensive NCD services in primary health care, including Telehealth

18 countries have national plans for NCDs

2. **Community outreach** and participation in NCD services, with focus on equity

Interventions in Bolivia (Chaco), Peru (Camaná, Churcampa), Costa Rica (Bruna), and Colombia (Casanare, Cauca, Huila)

3. Normative **NCD guidance and quality** of NCD care improvement

27 countries implementing HEARTs reaching 4 million patients; 9 countries developed evidence based NCD clinical practice guidelines

19 virtual courses available on PAHO Virtual Campus; 600k+ health professionals trained across 25+ countries.
